## 1999 Internal ECAMP Assessment

The 1999 Internal ECAMP took place during September 20 – 29. The results of the assessment can be obtained by going to the ECAMP intranet web-site: <http://emintranet>.

## Site-Specific Checklists

Site-Specific checklists are in the works to provide specialized environmental instruction on a per-building basis.

## ECAMP Intranet

Once ECAMP findings have been assessed they need to be tracked until closed. At the beginning of every month Program Managers and Environmental Reps provide status updates to the ECAMP Program Manager. The ECAMP Program Manager then sends these updates to Headquarters for continued tracking until closed. Recently the process for submitting and recording these updates has changed. Now the Managers and Reps have been asked to use the ECAMP intranet protocols database. All updates on the Management Action Plans, (MAPs) and Expected Completion Dates, (ECD's) can be done electronically. A visit to the comprehensive database allows access to previous year's findings, tables categorized by major, minor or positive findings, updating capabilities and the ability to print actual finding forms.

The ECAMP intranet web-page can be found by following these steps:

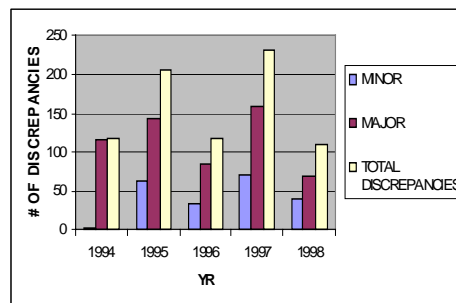

1. go to <http://emintranet>
2. click on EM
3. click on Compliance
4. click on Protocols Database
5. when prompted, type  
username: **ecamp** and password: **nosat3too**
